## SKILLS

JAVA

JSP

Python

Algorithms

Data Structures

Deep Learning

SQL

HTML

## LANGUAGES

Hindi

Full Professional Proficiency

English

Full Professional Proficiency

Japanese

Elementary Proficiency

## INTERESTS

DBMS

Singing

Artificial Intelligence

Machine Learning

Competitive  
Programming

Software Development

Video Editing

## EDUCATION

### B.Tech - Computer Science and Engineering

Harcourt Butler Technical University, Kanpur

08/2017 – Present

CGPA - 8.464 (till second year)

### XII

DAV Public School, Kota, Rajasthan

04/2015 – 05/2016

93.67% - PCM

### X

Delhi Public School Moradabad

04/2013 – 05/2014

10 - CGPA

## CERTIFICATES/TRAINING

### What Is Data Science? (10/2019 – 10/2019)

The course trained the basic concepts of data science as What is data science and what are data scientists? The course also explained basics of HADOOP and CLOUD.

### Neural Networks And Deep Learning (09/2019 – 09/2019)

I learned about Neural Networks and the basic building blocks of Neural Network. I learned how to avoid the explicit waste of time by working on python libraries as numpy and pandas.

### Improving Deep Neural Networks: Hyper parameter Tuning, Regularization And Optimization (09/2019 – 09/2019)

Through this course I learned about various variance regularization methods and dropout methods. I learned about exponential weighted averages, algorithms like Gradient Descent, RMS Prop, ADAM optimization.

### Structuring Machine Learning Projects (10/2019 – 10/2019)

This course let me know how to test the dev and the test set and the training set.

### Convolutional Neural Network (07/2019 – 08/2019)

I learned how to train the neural networks and how the convnets work. Object detection and Image Processing core skills have been improved.

### JAVA And ORACLE 10g TECHNOLOGY (06/2018 – 07/2018)

got training of the core java, Java Database Connectivity, Software application development, have build a local host Railway Reservation System.

## PERSONAL PROJECTS

### RAILWAY RESERVATION SYSTEM (03/2019 – 04/2019)

- This is a dummy of localhost railway reservation system in which a software application is there to validate the user identity by confirming password and booking and cancelling tickets and viewing trains from different locations.
